## Problem

#### Vector-2, Example-1, Question-20

The line joining the points  $\binom{-6}{8}$  and  $\binom{8}{-6}$  is divided into four equal parts; Find the coordinates of the points of section.

# **Solution:**

Let us consider the coordinate of points **D**, **E**, **F** which divides the line segment **A** and **B** into four equal parts.

In the ratio of **m:n** in given by the section formula:

$$\mathbf{S} = \frac{m\mathbf{B} + n\mathbf{A}}{m+n} \tag{0.0.1}$$

The coordinate of point **D** which divide the line joining **A** and **B** in the ratio of **1:3** is given that,

$$\mathbf{A} = \begin{pmatrix} -6\\8 \end{pmatrix}, \mathbf{B} = \begin{pmatrix} 8\\-6 \end{pmatrix} \tag{0.0.2}$$

$$\mathbf{D} = \frac{1\mathbf{B} + 3\mathbf{A}}{4} \tag{0.0.3}$$

$$= \frac{1\binom{8}{-6} + 3\binom{-6}{8}}{4} \tag{0.0.4}$$

$$=\frac{1}{2} \begin{pmatrix} -5\\9 \end{pmatrix} \tag{0.0.5}$$

The coordinate of point **E** which divide the line joining **A** and **B** in the ratio of **1:1** is given that,

$$\mathbf{E} = \frac{1\mathbf{B} + 1\mathbf{A}}{2} \tag{0.0.6}$$

$$=\frac{1\binom{8}{-6}+1\binom{-6}{8}}{2} \tag{0.0.7}$$

$$=\frac{1}{2} \begin{pmatrix} 2\\2 \end{pmatrix} = \begin{pmatrix} 1\\1 \end{pmatrix} \tag{0.0.8}$$

The coordinate of point F which divide the line joining A and B in the ratio of 3:1 is given that,

$$\mathbf{F} = \frac{3\mathbf{B} + 1\mathbf{A}}{4} \tag{0.0.9}$$

$$= \frac{3\binom{8}{-6} + 1\binom{-6}{8}}{4} \tag{0.0.10}$$

$$=\frac{1}{2} \begin{pmatrix} 9 \\ -5 \end{pmatrix} \tag{0.0.11}$$

Fig. 0: Plot obtained from python code use this points  $\mathbf{D} = \frac{1}{2} \begin{pmatrix} -5 \\ 9 \end{pmatrix}, \mathbf{E} = \begin{pmatrix} 1 \\ 1 \end{pmatrix}, \mathbf{F} = \frac{1}{2} \begin{pmatrix} 9 \\ -5 \end{pmatrix}$
